To Whom It May Concern,

I am pleased to recommend **Gedevan Kuprava**, who has worked with Promedia, affiliated with EssenceMediacom, as a Graphic and Motion Designer.

Gedevan is a highly capable creative professional with extensive experience across graphic design, motion graphics, video editing, and print production. He combines strong creative judgement with the technical discipline needed to turn ideas into polished, high-quality materials across a wide range of formats.

During his time with the Promedia team, Gedevan has also contributed to international projects, developing and adapting creative assets in accordance with global brand guidelines and market-specific requirements. He understands how to preserve the integrity of an established visual identity while ensuring that materials are relevant, accurate, and effective for local execution across different channels.

Gedevan consistently demonstrates an ability to understand the purpose behind a brief and translate it into clear, engaging, and brand-appropriate visual work. Whether creating digital campaign assets, animated content, video adaptations, or production-ready print files, he approaches each task with care, flexibility, and attention to detail.

He is particularly reliable in fast-moving environments. Gedevan manages deadlines well, remains solution-oriented when requirements change, and maintains a high standard even when handling several projects at once. He is also easy to work with: open to feedback, professional in communication, and a supportive collaborator within a wider team.

I believe Gedevan would be a valuable addition to any creative, marketing, or production team looking for an experienced designer who combines visual creativity with dependable execution. I recommend him with confidence.

Sincerely,

Nutsa Gotsadze
