PROFILE

Seven years producing advertising visuals at AdsomeFish, the agency that represents dentsu in Georgia, and at Media Solution, Tbilisi, for global and local brands. Static and motion, screen and print: the work has run on television, billboards, metro, bus shelters, stadium perimeter boards, in newspapers and magazines, and online through local sites, Google Ads and social. I take a campaign from brand-supplied material through to every format it needs — and where a global master will not carry into Georgian typography, I rebuild the setting so the local version reads as deliberately as the original.

SELECTED WORK

Samsung

multi-year account

Galaxy launches, Bespoke AI, Privacy Display — consistency across years, not one hero frame

Mine: adapting the global campaign for the Georgian market — Georgian typography set into the master, then the complete format matrix for each launch, from 9:16 social to outdoor.

Coca-Cola

Georgia · MTIS

Campaigns, and stadium advertising at the Parc des Princes

For Coca-Cola Georgia, roughly half the work built from their material and half adapted from the global master. Separately, for MTIS — a mountain-water brand produced under the same Coca-Cola franchise in Georgia — the campaign ran on the perimeter boards of PSG's stadium in Paris.

Mine: the MTIS creative, made from scratch — including the board format, where artwork is read in motion, at distance, in a fraction of a second, so every decision is scale and contrast.

Nestlé

six brands

Global master → Georgian market — Nescafé, Nesquik, KitKat, Maggi, Felix, Purina

Mine: the Georgian adaptation across the group — one duration table, each master re-laid out for local type and every format the market runs.

Georgian Rugby Union

and local brands

Created from scratch, not adapted

Mine: the whole visual — for the Rugby Union, and for SPAR, Cito, Gifthub, Marao, Nixar, Biltmore, Freedom Music, TKT.GE and others, where there was no global master and the idea started with me.

EXPERIENCE

Sep 2019 — present

AdsomeFish (dentsu Georgia affiliate) · Media Solution, Tbilisi (currently remote, based in Brussels)

Graphic & Motion Designer

- Over a thousand briefs across seven years — **542 of them logged on one delivery board alone, Jan 2023 – Jul 2026** — several parallel deliveries a week, each to its own written specification.
- Own the chain end to end — key visual, endframe, packshot, animation, export, delivery spec — then version each campaign across the full format matrix, from 9:16 social to outdoor, print and in-store.
- Outgoing quality control was mine; the studio archive runs to **20,000+ assets across 80+ finished projects**, and I reviewed junior designers' work.

Jun — Aug 2025

Bitpanda GmbH, Vienna (freelance)

Designer — Brand Uplift rebrand

Digital, print and motion assets for the rollout of Bitpanda's new identity, working to the project's Art Director. Europe's leading broker for stocks, crypto, indices, ETFs and precious metals — a rebrand where one standard had to hold across every customer touchpoint.

2018 · 6 months

AdsomeFish, Tbilisi

Social Media Manager

Client content calendars end to end — planning, publishing, community, reporting. Where I learned how a message behaves per channel, which now decides how I version a campaign.

2017 · 6 months

Freelance, Tbilisi

Copywriter

Commercial copy on brief for Askaneli XO, Samsung Georgia and Magistri Security — the reason I localise text as carefully as layout.
