

To Whom It May Concern,

I am pleased to recommend Gedevan Kuprava, who worked with us as a freelance designer on Bitpanda's Brand Uplift project during our major rebranding from June to August 2025.

Bitpanda is Europe's leading broker for stocks, cryptocurrencies, indices, ETFs, and precious metals. The company also partners with some of the world's most prominent sports organizations, including FC Bayern Munich, AC Milan, Arsenal, ATP, and FC Basel. Considering Bitpanda's scale and visibility, the rebranding was a significant project that required a consistently high standard across every customer touchpoint.

As the Art Director on the project, I worked closely with Gedevan throughout the rebranding process. He contributed to a wide range of digital, print, and motion assets, translating the new brand direction into polished and technically strong design work.

Gedevan demonstrated excellent technical skills, versatility, and a strong understanding of visual design. He was able to work confidently across different formats and production requirements while maintaining consistency with the new brand identity. He approached each task with care, professionalism, and close attention to detail.

His contribution was valuable to the successful rollout of Bitpanda's refreshed identity, and he proved himself to be a skilled and reliable designer throughout the project. I would confidently recommend Gedevan to any company or design team looking for a versatile designer with strong technical expertise and experience working on a large-scale international brand.

Please feel free to contact me if you require any additional information.

Best Regards

Lika Keshelava
